

GAKUNEN

ACADEMIC EXCELLENCE

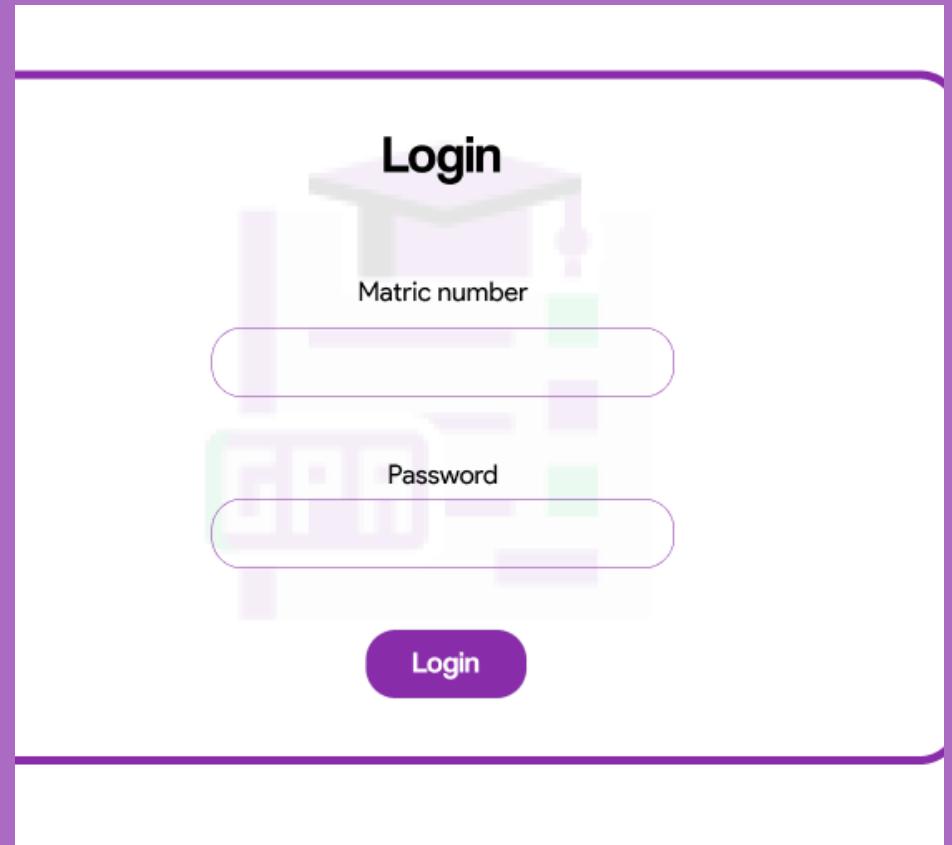

# About

Gakunen with it's inbuilt functions and operations aims to help students keep track of their academic success.

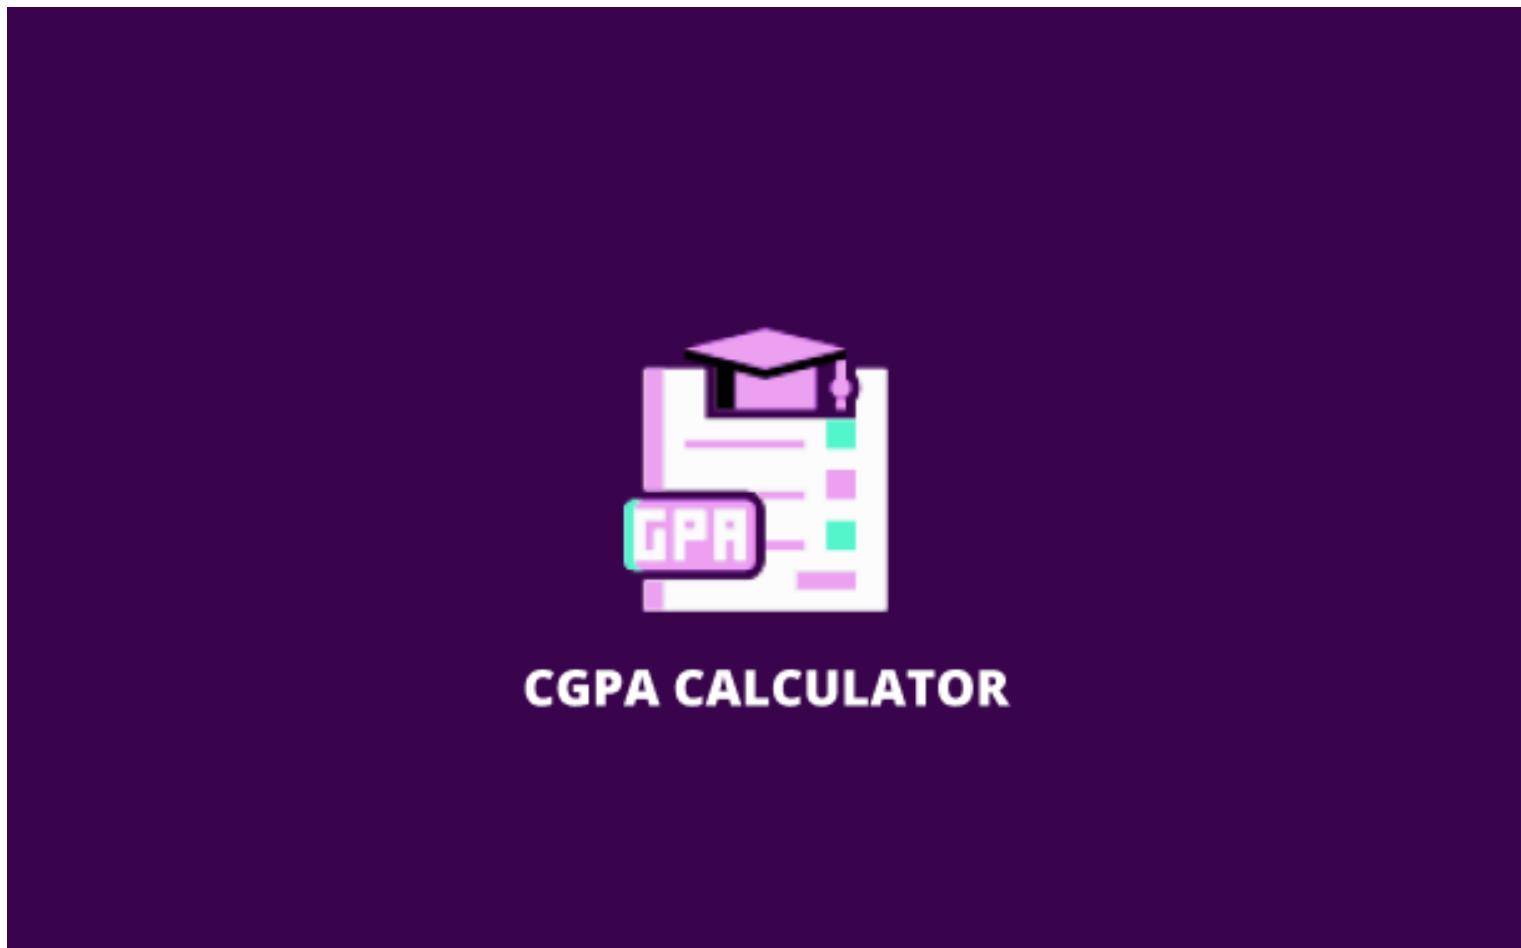

# Why?

As a team we strongly believe that through Gakunen, student's can easily get their desired CGPA.

cause let's face it, who does not like the title "FIRST CLASS HOLDER"

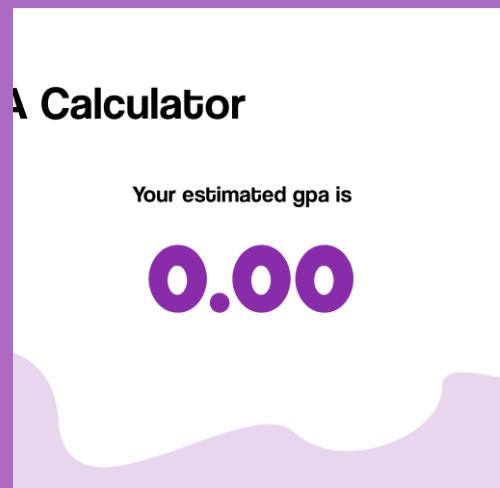

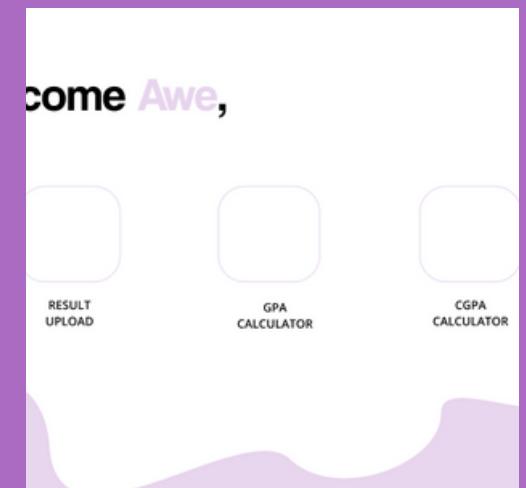

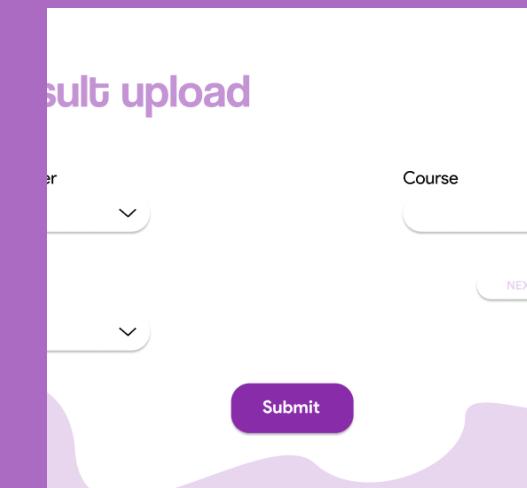

# what makes the GAKUNEN different?

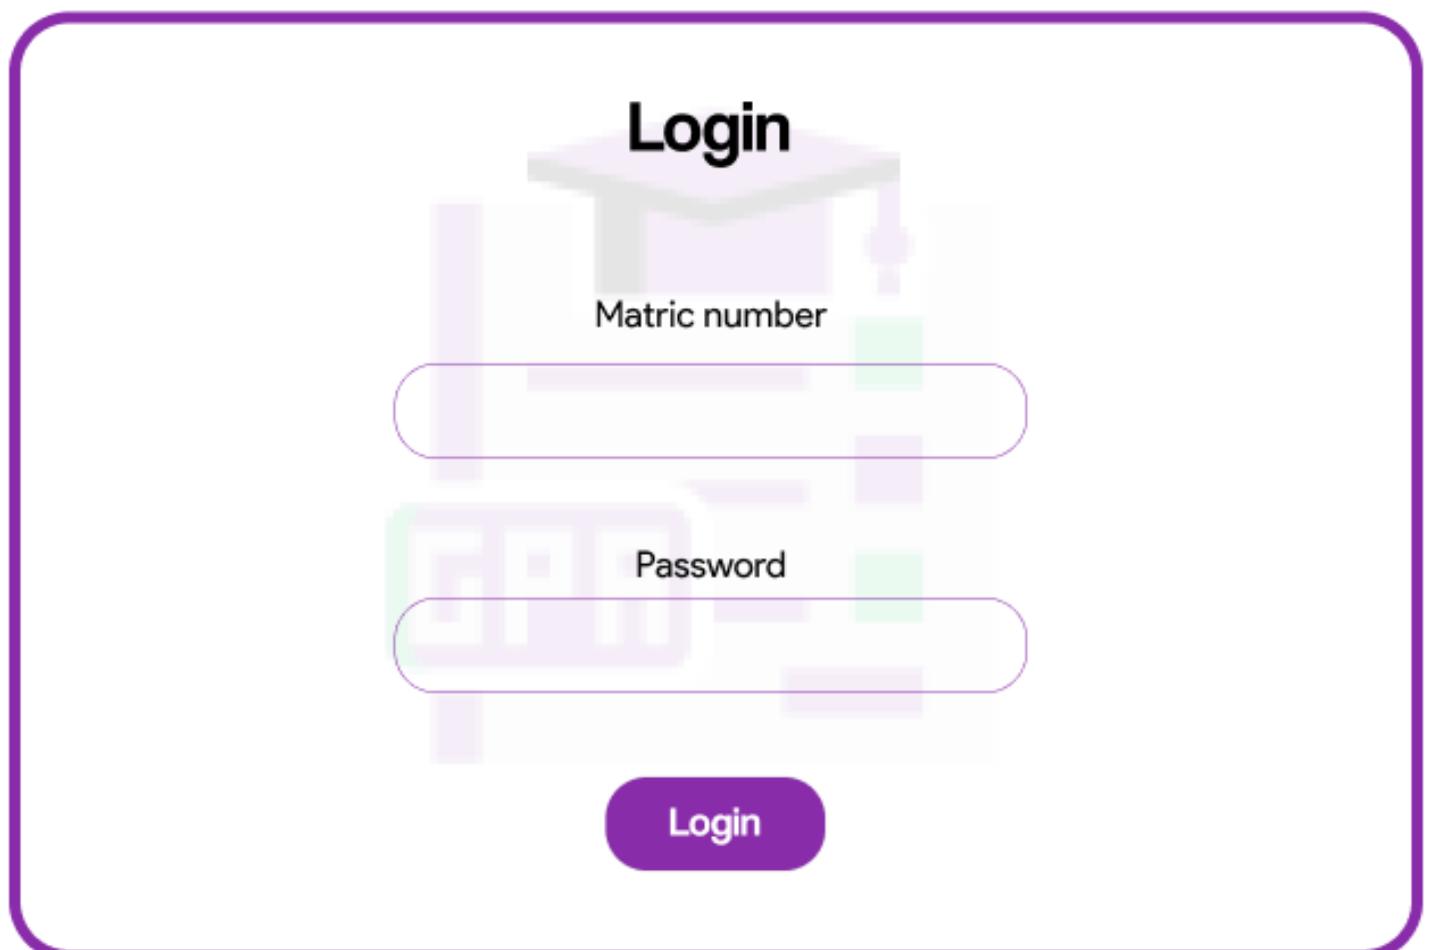

The Gakunen calculator is not just your ordinary calculator. You can keep track of your GPA and also reach your desired CGPA goal..

# FEATURES

- Fire base authentication
- Result upload
- Predicting function(Machine model)

# Firebase Authentication

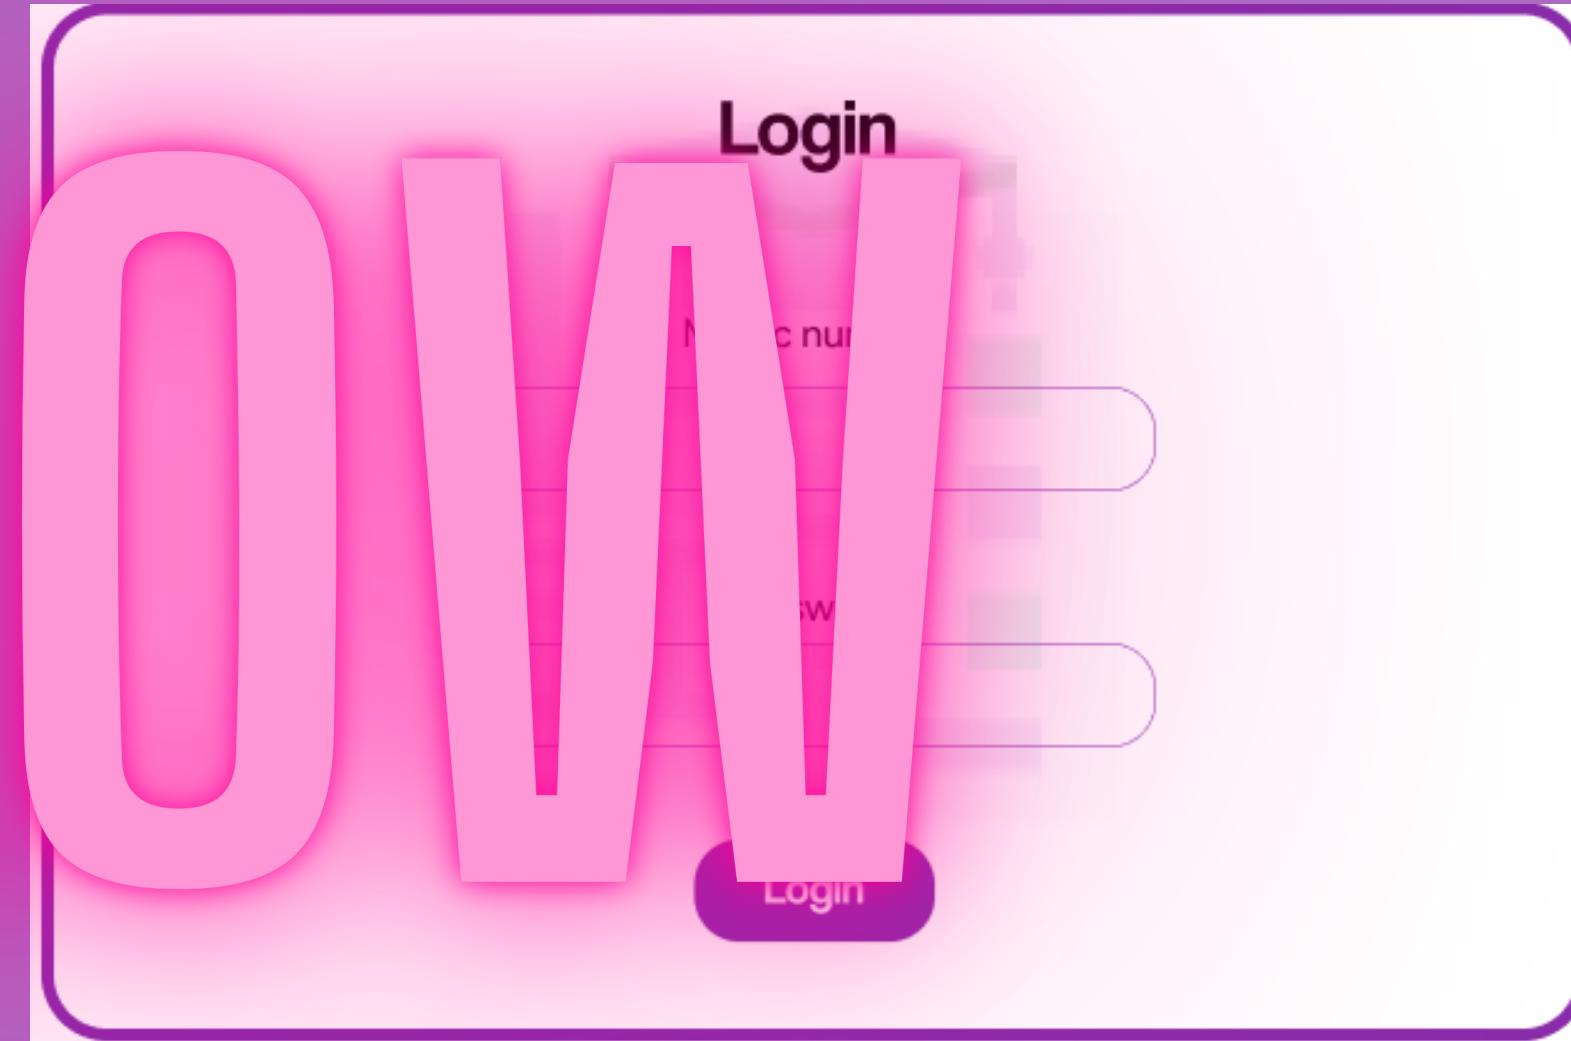

This feature allows you to register using your e-mail, phone number as well as your google account.

# Registration page

This way you can log in,  
log out and  
have your personal  
information protected.

# clone

# Result upload

The screenshot shows a user interface for 'Result upload'. At the top, the title 'Result upload' is displayed in a purple font. Below the title are three input fields: 'Semester' (with a dropdown arrow), 'Course' (with a dropdown arrow), and 'Grade' (with a dropdown arrow). A 'NEXT' button is located to the right of the 'Course' field. At the bottom center is a purple 'Submit' button.

The result upload function allows user to input their results such as their test scores and exams. This stores your result data so even if you have not finished completing uploading the data you can always come back to update the data.

# Predicting function(Machine model)

In the near future we plan on adding a machine model function that way users can always find out what GPA grade you need in the next semester to get your targeted CGPA.

## GPA Calculator

Your estimated gpa is

**0.00**

THANK  
YOU
